

Vice Chancellor's Message on 57th Engineers Day – 2024

Happy Engineers Day!

My heartiest greetings to all engineers and budding engineers on 57th Engineers Day being celebrated to commemorate the 124th Birth Anniversary of Bharat Ratna Sir Mokshagundam Visvesvaraya. This day reiterates the role of creative minds in transforming ideas into reality to ease human life which has brought us to the present state of civilization.

While

gratefully acknowledging the contributions of engineers and technologists, I wish to call upon all engineers & technologists to realize their roles and responsibilities in shaping the future through sustainable developments in all walks of life. It's time to visualize the signs of distress shown by Earth's system change and understand the reasons for the rising temperatures, melting of glaciers, loss of forest cover, degrading soil quality, etc.

Undoubtedly, these changes in the Earth's system are damaging everyone inhabited on this planet alike. Challenges with respect to the availability of clean air, water, biodiversity, and climate change due to overconsumption, pollution and absence of planning for managing Earth's resources are demanding immediate interventions. It has become inevitable to go for the bold and well-thought-out action plan for overall human development while ensuring that mother earth remains stable and resilient.

Let us feel proud to be part of the family of engineers and technologists and work in synergy to solve the problems around us and turn our dreams into realities.

With best wishes to all engineers and budding engineers!

Prof. Onkar Singh

Vice Chancellor

Veer Madho Singh Bhandari Uttarakhand Technical University
Dehradun, (Uttarakhand) INDIA

Date: 15th September 2024
