FOREWORD

All India Council for Technical Education (AICTE) was established in 1945 as a National Level Apex Advisory Body and as a Statutory body by an Act of Parliament in 1987 for developing and promoting quality technical education in the country in coordinated and integrated manner. Over the years higher education, particularly technical education has become inclusive and available to all those who were interested from the initial days whereas earlier it was the fortunate few who had access to higher education particularly technical education. It has been endeavour of AICTE to make quality technical education inclusive and affordable to all. AICTE has taken several proactive measures for planned and qualitative growth of technical education and effectively implemented the same.

AICTE has changed its role from regulator to facilitator and has been ensuring that with changing time and new discovery/changes in technical education, the curriculum remains relevant and dynamic. Relevant changes have been incorporated in Approval Process Handbook which is published annually. Focus has always been on quality of education, simplicity of procedures and transparency in implementation. It has always been two-way communication, suggestions of all education partners / stakeholders have been considered and implemented wherever practicable.

In the midst of covid crisis, nation has risen successfully and is chartering a new territory in education.

National Education Policy 2020 (NEP) aims to bridge the gap between current learning outcomes and what is required through undertaking major reforms that brings the highest quality, equity and integrity into the system. National Education Policy (NEP) envisages multidisciplinary education so that boundaries are removed to promote overall development of students in different disciplines. In this regard, in line with NEP, AICTE has added several subjects in the eligibility list apart from Physics, Mathematics and Chemistry. Further

NEP 2020 envisages that Technical Education shall be imparted in Indian Languages also. AICTE has already initiated steps and granted approval for conducting technical courses in Indian Languages. It can be said AICTE has adopted the vision of NEP regarding flexibility, multidisciplinary and innovation in true spirit. Good infrastructure and enrolment of students only cannot ensure quality technical education unless focused attention is given on quality teaching learning.

Endeavour of AICTE has been on supporting the institutions to get autonomy, accreditation ranking etc. through Margdarshan, Adjunct faculty, Unnat Bharat Abhiyan, Research Promotion Scheme. AICTE Doctoral Fellowship (ADF), Short Term Training programme (STTP), National Initiative for Technical Teachers Training (NITTT), AICTE – IDEALAB, a MOOCs platform SWAYAM, Start-up Policy etc. Model Curricula Teacher Training Programmes for both new Teachers and in service Teachers through ATAL academies, Student Induction Programme, Mandatory Internship for students, Recognition to the teachers, Examination Reforms, Support for Innovation and entrepreneurship, Industry Interaction Cell, National Prospective Plan are some of the innovative ideas implemented by AICTE.

Instead of major changes, attempts have been made in this Approval Process Handbook 2022-23 to consolidate and refine the guidelines which are already there so that process of evaluation of applications of the institutions become hassle free. AICTE assures to all the stakeholders that it will continue to be a facilitator taking care of changing needs of all concerned and hope that with concerted effort of all concerned, quality of technical education in India will reach a new pinnacle during coming days.

This handbook is an attempt to provide comprehensive information on the fair and rational system of administration as well as other necessary information on the processes involved under the aegis of AICTE. The emphasis on e-governance to ensure transparency and accountability, and implementing a tech-savvy approach to enable faster processing and clearly defining the Infrastructural norms in Institutions are just a few pointers towards AICTE's efforts at fostering a technical education system which is on par with the best institutions in the world.

The slogan of this year is "*Vigyan Sarvatra Pujyate*" means science is revered all over and will display our scientific legacy and technology prowess that have helped find solutions to problems in defence, space, healthcare, agriculture, astronomy, and others. Society should respect and revere science and the scientific community, and this would be possible only through constant interactions between the scientific community with the public. If this happens, it will indeed create a new stronger India that can address the challenges humanity may encounter in the near future, especially in sharing the resources essential for maintaining healthy life on this planet.

Swami Vivekananda said, "Education is the manifestation of the perfection already in man". In keeping with this objective, apart from regulatory role, AICTE shall continue to strive to be a true mentor, facilitator and enabler in bringing out the best in each Institution. We hope all the education partners/stakeholders of technical education shall also put in their best and make team India proud and make "*Atmanirbhar Bharat*" a reality.

योग: कर्मसु कौशलम्

PREAMBLE

1. Background and Statutory Provision under AICTE Act Regarding Planning, Promotion and Regulation of Technical Education

The beginning of formal Technical Education in India can be dated back to the mid-19th Century. The major Policy initiatives in the pre-independence period included the appointment of the Indian Universities Commission in 1902, issue of the Indian Education Policy resolution in 1904 and the Governor General's Policy statement of 1913 stressing the importance of Technical Education, the establishment of IISc in Bangalore, Institute for Sugar, Textile and Leather Technology in Kanpur, National Council of Education in Bengal and Industrial Schools in several provinces. Significant developments include:

- i. Constitution of the Technical Education Committee of the Central Advisory Board of Education (CABE) of 1943;
- ii. Preparation of the Sergeant Report of 1944; and
- iii. Formation of the All India Council for Technical Education (AICTE) in 1945 by the Government of India.

AICTE was set up in November 1945 based on the recommendations of CABE to stimulate, coordinate and control the provisions of Educational facilities and industrial development of the post war period. At that time, a mandate of AICTE covered only Programmes in Engineering and Technology.

The growth of industries in the Country, just after independence, also demanded the need for qualified professionals in other fields, such as Business Management, Architecture, Hotel Management, Pharmacy etc. Although the diverse elements of Management such as Commerce, Economics, Finance, Psychology and Industrial Sociology were being taught for a long time, the need for Management Education in a formal way was felt in India only in the fifties. The Government of India decided in 1954 to set up a Board of Management Studies under AICTE to formulate standards and promote Management Education. Other major initiatives taken in Management Education include setting up of the Administrative Staff College of India at Hyderabad in the late fifties, National Productivity Council and Indian Institute of Management in the early sixties. Architecture was covered under the Architects Act, 1972. Subsequently, for better coordination of the Professional Courses, Architecture Education was also placed under the purview of AICTE.

Hotel Management Education had a modest beginning with short Programmes in Nutrition and Food Science, which started in the late fifties. The National Council of Hotel Management and Catering Technology were set up in 1982, to which all the Institutions of Hotel Management run by the Government are affiliated.

Education in other professional fields such as, Pharmacy, Applied Arts, Crafts and Design has also undergone similar developments during the post-independence period. Programmes for Technical Education, during the first three Five Year Plans, were devoted to the expansion of Technical Education to meet the growing demand for technical personnel at Diploma, Degree and Post Graduate Levels. From the fourth Five Year Plan onwards, the emphasis was shifted to the improvement of quality and standards of Technical Education. This was done through implementation of the Quality Improvement Programme consisting of three major components that provided for M.E. /M. Tech. and Ph.D. Programmes, Establishment of Curriculum Design and Development Cells, and Short Term Training Programmes.

Meanwhile, expansion of Institutions and Intake remained at a low Level in the Government, Private-aided and University sectors. The Policy Shift during the eighties towards involvement of Private and Voluntary Organizations in the setting up of the Technical and Management Institutions on self-financing basis ushered in an era of unprecedented expansion of the Technical Education System, a trend which has continued during successive Five-year Plans.

It was in this context that AICTE was given statutory powers by AICTE Act of Parliament in 1987, with a view to ensure the proper planning and coordinated development of the Technical Education System throughout

the Country. Technical Education in this context includes fields of Engineering and Technology, Pharmacy, Architecture, Planning, Applied Arts, Crafts and Design, Hotel Management and Catering Technology and Management.

9. Current Status of Technical Education

The growth of Technical Education in the Country before independence was very slow. The number of Engineering Colleges and Polytechnics in 1947 was 44 and 43 with an Intake capacity of 3200 and 3400 respectively.

Due to the efforts and initiatives taken during successive Five-year Plans and particularly due to Policy changes in the eighties to allow participation of Private and Voluntary Organizations in the setting up of Technical Institutions on self-financing basis, the growth of Technical Education has been phenomenal. Technical Education at all Levels in the Country is witnessing a consistent growth pattern marked by the setting up of new Technical Institutions and the improvement of the existing ones in tune with the quality assurance norms set by the regulating and accreditation agencies.

ANNEXURE-1

National Perspective Plan

Recommended Short and Medium Term Perspectives for Engineering Education in India by the Committee

AICTE put a moratorium on opening new institutions in traditional areas of Engineering & Technology at Degree, Diploma and PG Level from 2020-21 onwards for two years in 2019. A committee was constituted in Oct, 2021 for "Reviewing Moratorium on Approval to New Engineering Institutions from Academic Year 2022-23 onwards" under the chairmanship of Shri BVR Mohan Reddy. The committee has gone through the intake capacity, trends of enrolment and placements in UG, PG and Diploma Level in AICTE Approved Institutions and after data analysis submitted its report on 31.12.2021.

The main highlights of the report are as follows:

Undergraduate (B.Tech.) Programmes:

New institutions: Moratorium on new engineering institutions should continue barring with a few exceptions such as:

- a) AICTE may allow well-meaning philanthropists, educationists or educational foundations to create new institutions of excellence. Such institutions should create a capacity of 3000 seats in line with NEP 2020 guidelines. Further, these institutions should have large owned campus and student amenities comparable with that of globally reputed institutions. AICTE may suitably frame the financial and infrastructure requirements for creating such institutions. These should offer core and interdisciplinary courses with emphasis on emerging technologies and employable skills, have collaborations with reputed foreign educational institutions, partner with corporates, and gain an NIRF ranking of <100 in the first five years and <50 in 10 years of their founding.
- b) As per Government of India guidelines, every aspirational district in the country (220 of them) should have an engineering college. Currently, only 180 districts are covered. The State governments be given the flexibility to start engineering colleges in the remaining 40+ districts. The State governments must provide necessary budgets for infrastructure, faculty and labs before seeking approval to set up an engineering college in districts that do not have one.
- c) Facilitate conditional capacity creation in existing institutions: While the situation of low enrolments is concerning, continuing a blanket ban on new capacities may be detrimental to the future sustenance of quality engineering education. It will be prudent to facilitate limited and conditional capacity creation based on the following guidelines: It is observed that a few institutions have reported more than 100% enrolments in 2021. A number of institutes have reported >80% enrolments. It would be prudent that extra capacities be permitted to institutions with good NIRF ranking (<100) that have reported >80% enrolments last three years as below:
 - i) 95-100% enrolments – additional capacity of 25% be permitted
 - ii) 80-95% enrolments – additional capacity of 15% may be permitted

Colleges that have more than 50% of enrolment should be allowed to start new courses in emerging technologies within their existing capacity. At the same time, the capacity in core engineering disciplines such as mechanical, electrical, electronics and civil engineering cannot be reduced by more than 50% of the approved capacity. Address the demand-supply imbalance through supply-side corrections. Installed capacity exists, we need to shift focus to quality education to enhance foundational skills and industry-linked internships.

Digital Technologies:

Digital technologies should become integral to curricula across all engineering disciplines. A minor in digital technologies is mandatory for all the disciplines. Programmes in digital technologies at UG level have limited visibility in the industry. Focus on faculty training, blended learning, projects and industry internships to improve specialised skill talent. Capacities in four-year programmes in digital technologies should be reviewed and modulated on an annual basis keeping the industry needs and skill shortages in view.

New Disciplines & Specialisations

Introduce new disciplines that are industry-relevant – Communication and Security Engineering, Manufacturing Engineering (additive, subtractive, 3D printing, etc), Transport Engineering, Energy Engineering, Information Engineering, Public Health Engineering (water, environment, pollution, sewage etc), Healthcare Engineering, Computational Engineering, Environmental Engineering, Geomatics/ Geospatial science & technology/ Geoinformatics, etc (indicative list, not exhaustive). Some of these could be made available at masters' level. Thematic undergraduate programmes in Circular Economy, Sustainability, Environment, etc.

- Introduce new specialisations - Microelectronics and VLSI, smart mobility, EV technology, Transportation, Highway engineering, Renewable Energy, Climate Change, Earth System Sciences, Future Communications especially 5G, Sustainable Development & Circular Economy, Waste Management, Product Design, AI plus technologies like CRISPR – Cas 9 (indicative list, not exhaustive).
- Electives & Credits:

Have a large number of elective credits available across disciplines. For example, a student in ME does 50% basic of ME, then they get to choose from a large number of electives and are given the flexibility to do a full semester internship with the industry.

The total number of credits for graduation must be reduced from the current 160-180 to 135-140. The objective is to encourage students to give more time to self-study, group discussions/projects and peer group learning. This would nurture the culture of self-directed learning as opposed to being confined to passive classroom learning for more time.

- Core disciplines (ME, EE, EC, CE) need urgent revamp to cater to the rapidly evolving needs of the industry and rapid changes occurring in technologies. Core engineering industry should proactively support engineering institutes to produce engineers of the required skill set in their own interest. Each engineering industry should tie up with or adopt core engineering departments of at least 3-5 engineering colleges, help them develop curricula in core engineering branches, and mentor the students and faculty.
- Encourage start-up and entrepreneurship activity in core branches by setting up innovation hubs and tinkering labs, providing financial and mentoring support to students of core branches with innovative ideas, and providing credits for spending time on such ideas.
- Provide a chance for core disciplines to do a Double Major by undertaking extra credits.
- Start centres of excellence (CoEs) in core branches and involve students to get them excited to take up various projects.

2. Post Graduate (M.Tech) Programmes

The enrolment trends in post-graduate programmes confirm that there is no state, discipline or institution category (government/private) for which the moratorium of approval to PG programmes in engineering institutions can be lifted. Existing PG programmes need to be restructured and made R&D and Industry Centric. Institutions /universities should replace the courses that have lost relevance with those in demand from the industry and those in line with government vision.

3. Diploma Programmes

- i) The enrolment trends in diploma programmes confirm that about 50% of existing capacity is lying vacant. This warrants us not to add any new capacity.
- ii) There is an urgent need to review the curricula of diploma programmes. In the Western world, diploma holders, who primarily graduate from what are known as community colleges, find a lot of relevance in the industry. Indian industry is suffering on account of the non-availability of such relevant and well-trained manpower. This needs serious attention.
- iii) Laboratory equipment is poorly maintained and is outdated. For India to emerge as a globally competitive nation across sectors, it is essential to strengthen this stream of basic engineering talent.
- iv) Industry-academia connect is critical for diploma holders. Internships and apprenticeships need to be used extensively.
